Chief Engineer

Your File 31-120-20

Gentlemen:

According to the records of this Office, the United States Government owns an 8" V.C.P. sewer in Vermont Avenue beginning in Lot 47 at Tract No. 4671 and extending to Lot 45; from that point on it becomes a 12" V.C.P. sewer and continues on over Vermont Avenue to James Street, thence east along James Street to a point about 200 feet north of Figueroa Street where it becomes a 15" V.C.P. sewer and ties in to the main sewer of the County of Los Angeles at Main Street. This sewer was constructed to serve three Synthetic Rubber Plants owned by the Government, operated by Dow Chemical Company, Shell Chemical Corporation and Midland Rubber Corporation.

We have been advised that a housing project has been connected to this sewer with a 12" stub at the corner of Vermont Avenue and James Street, presumably with the permission of the County Sanitation District.

It will be appreciated if you will advise whether or not the County Sanitation District has given such permission and, if so, by what authority. An early reply is requested since it has been proposed to the Congress by the Rubber Producing Facilities Disposal Commission to sell these three plants to private interests and it is our desire to transfer these plants without encumbrances.

Very truly yours,

/s/ G. J. Irwin
